Subject: MORTAL DANGER TO THE REALM AND THE GENREAL PUBLIC AT THE QUEEN ELIZABETH SPORTS STDIUM
Date: 15 September 2015 07:04:34

Mayor of London

Dear [REDACTED]

My fears and concerns for the Realm and the General Public ref the subject title are FAR FAR worse than I had originally anticipated. I am on record with your office and the London Legacy Authority ref Lightning Protection Failures but that is my secondary concen. My primary concerns are related to the fact the Olympic Stadium and Village were built on an old Landfill Site which now offers serious Radioactive Waste threats along with other dangers from Throrium and Methane Gasses inter alia.

There is documented evidence that Balfour Beatty, Camden Council and the Environmental Agency have failed their fiduciary duty of care ref Contamination Remediation (CR) for the Olympic Project.

I would also add the Mayor Office 's and the London Legacy Authority to the long lists of FAILED Oversight Authorities ref CR.. It beggars belief the Olympic Stadium and the Olympic Village has been built smack bang on top of a Radioactive /Landfill Site WITHOUT adequate CONTAMINATION REMEDIATION Risk Assessments.

I look forward to your response.

With thanks

Yours sincerely

[REDACTED]
PS Please treat this as a FOIA request for copies of all correspondence, approvals etc including emails ref Contamination Remediation measures or please direct me to your FOIA disclosures site.
