Subject: Re: New West Stand SW Panel between home and away supporters

Hi All

One of the things we discussed was the possibility of having some kind of netting to prevent/reduce the risk of things being thrown. Is this something that can be included as this has been installed at other PL grounds.

Kind Regards

 s.40 [redacted]

Subject: RE: New West Stand SW Panel between home and away supporters

Hi [redacted],
For me if there are no sight line problems the higher the better. I think what we have at the moment has been a massive improvement.

s.40 [redacted]

Cc: s.40 [redacted] <s.40 [redacted]@londonstadium185.com>
Subject: New West Stand SW Panel between home and away supporters

All

Please see some visuals of the new west stand panel in the south west corner.

The images are of a 2m panel. The red line shows a 2.5m height. There do not appear to be sightline issues from going to 2.5m, and it creates a better visual separation of home and away supporters.

[redacted] reviewing from a safety operations perspective, and we are also reviewing if a 2.5m panel is feasible; as well as what it means for other modes;. Could you give the club's thoughts so we can make a holistic decision.

Thanks

Attachments: [image886549.png](#)
[image463521.png](#)
[ScreenHeightCheck.pdf](#)

Hi s.40

Please see attached PDF that shows the seated views from the South Stand and Middle Tier across the top off the proposed screen, and the standing views on row 3 and 26 at the southernmost end of the West stand looking towards the away fans.

The red line is a 500mm offset above the proposed 2m high screen to show the effect a 2.5m screen would have on views.

Many thanks,

s.40 RIBA
Senior Architect
